SUMMARY

Motivated and detail-oriented **Python Full-Stack Developer** with a **BCA** from **Calicut University (2025)**. Currently interning at Maitexa Technologies, Industry-ready Full-Stack Developer (React completed) now building Django backends through real projects. Delivers responsive, accessible **React.js UIs** and implements secure **REST APIs** with **Python/Django** and **MySQL**. Works confidently with **Git** and is ready to own features end-to-end with product, design, and QA.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, Tailwind
Backend: Node.js, Python Django
Databases & Tools: MySQL, VS Code, Figma, Trello, Slack
Version Control : Git, GitHub

PROJECTS

ComfoNest

E-Commerce Platform for Chairs & Sofas

July 2025 – Aug 2025

React.js, React Router, Context API

- **Dynamic Product Management:** Developed interactive product listings with detailed views, cart functionality, and optimized performance using Lazy Loading. Utilized CNN and LSTM models for image feature extraction and caption generation
- **Efficient & Scalable Architecture:** Utilized React Hooks and modular components with proper error handling for maintainable, high-performance applications.

LifeDrop

Blood Bank Management System

Sep 2025 – Sep 2025

Python, Django, SQLite

- Designed and deployed a centralized system for managing donor details, blood stock, and requests.
- Built dynamic dashboards showing real-time blood availability using Django ORM and Bootstrap UI.
- Integrated authentication for admin and users using Django's built-in auth system.

EXPERIENCE

Python Full Stack Developer Intern

Maitexa Technologies

June 2025 – Present

Calicut

- Developed and maintained responsive web pages using **React.js** and **Bootstrap**.
- Assisted in backend development using **Django** and **SQLite**.
- Collaborated with a team of developers to design and test web applications.
- Gained hands-on experience with **Git** and **MySQL**.
